

My name is Zhengda Wu, currently finishing my second year at Northeastern University with GPA 3.72, where I am pursuing a master's degree in computer science.

My experience includes:

- A solid base of HTML, CSS and JavaScript as front-end development and familiar with front-end frameworks such as React. Also, familiar with the back-end tools such as Node.js.
- Strong Java, python and PHP experience and led many individual programming projects.
- Familiar with Linux system for working.
- Strong knowledge of relational database systems(MySQL) and NOSQL(MongoDB)

I have two full stack projects, the first one is my IT forum, I used HTML, CSS and JavaScript for front-end, and PHP for back-end. The other one is that I created a Hamburger Order System which utilized React and Node.js.

In the daily life, I'm a very out-going student. I like sports very much such as basketball and swimming. Detailed-oriented, responsible and affable budding engineer graduating in May, 2020. Seeking an internship in a Tech company.
